Vision

Hearing

Smell

Touch

Heart

The design idea of KAFO new catalogues is providing comprehensive six senses performance, including Vision, Hearing, Smell, Touch, Taste, and Heart.

Vision: Visual Design Master creates designs covering all aspects

We create innovative designs covering every aspect to develop perfect machines.

Hearing: Hear your needs from every corner of the world

We hear and comprehend customers' needs actively from every corner of the world, and we practice thoroughly to exceed customers' expectations.

Smell: Smell the market demand and offer well-thought-out plans

We have superior market insights and perfect strategic ability to be the strong support of customers.

Touch: Pursue excellent quality to achieve high performance

We focus on the enhancement of top core technologies and capabilities, and develop solidly to achieve excellent quality.

Taste: Taste good service by our professional and efficient team

We provide efficient, professional, and comprehensive services, and establish permanent and deep relationships with customers.

Heart: Feel our Heart that always sticks to perfection

We manage business with all our heart, and stick to perfection, to create maximum benefits for customers.

KAFO

Kao Fong Machinery Co., Ltd.

*Taste good service
by our professional and efficient team*

www.kafo.com.tw

Over fifty years, KAFO has become the leading brand in Die & Molds field and Machining field based on its solid foundation of superior technology. "Steady Research & Development, Quality Control, Accumulate Experience" exceed customers' expectations and think globally, act locally.

We provide you comprehensive six senses performance, including Vision, Hearing, Smell, Touch, Taste, and Heart. As a visual design master, we create innovative designs covering all aspects. We understand and meet customers' needs from every corner of the world. Additionally, we smell the market demand and offer well-thought-out plans. Through strict quality control, we pursue excellent quality to achieve high and steady performance. Moreover, our professional team offer efficient 24/7 service which is worth experiencing. Operating with our Heart, we always stick to perfection. By means of accumulating experience, intensifying the know-how, focusing on the upgrading core competency of technology, and continuously improving the manufacturing process, KAFO realizes the commitment to customers for best quality products and also being rated as the benchmark of the industry.

Kao Fong Machinery Co. Ltd.

Vertical Machining Center Production Line

Horizontal & Double Column Machining Center Production Line

ASSEMBLY

- Assembly KAFO gear box and head unit in clean room.

- World class spindle bearings.

- Spindle assembly and adjustment in clean room with constant temperature and humidity.

- Spindle, gear box, and spindle motor balance test.

- Scrapping-The difference from other brand, with the KAFO line of Machining Centers, every component surface is finished by hand-scraping for a proper fit, ensuring that the machine itself is geometrically correct and long lasting. The hand-scraping process is labor intensive and must be performed by skilled craftsman who are trained in the technique. Machine components must be placed then removed up to 5 times to confirm that the machine base in both level and square.

DOUBLE COLUMN MACHINING CENTER

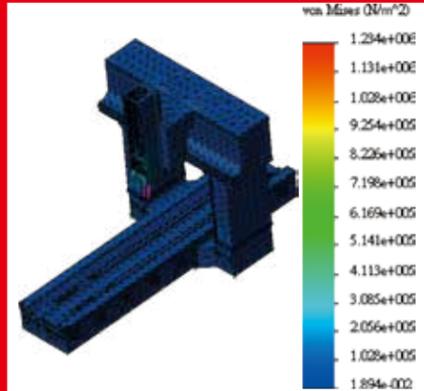

NEW GENERATION DESIGNED, PROVIDING BEST RIGIDITY STRUCTURE

- Extended beam cross-section A
- Widest column available in the market B
- Largest spindle head support C
- Thickest working table D
- Biggest contact area for column support E
- Minimum distance from spindle center to boxway F
- Short transmission shaft
- Long distance between guideways H
- Hydraulic counter balance system for Z-axis
- Roller linear guideways from NSK/THK (Japan) or INA (Germany)
- Highest quality Meehanite casting
- Hermo-symmetric box design base with high static and dynamic stiffness
- Minimum floor space layout due to rigid bed design

- A:** Extended beam cross-section
- B:** Widest column
- C:** Largest spindle head support
- D:** Thickest working table
- E:** Biggest contact area for column support
- F:** Minimum distance from spindle center to boxway
- G:** Short transmission shaft
- H:** Long distance between guideways

HIGH RIGIDITY STRUCTURE, HIGH POSITIONING ACCURACY

SUPERIOR BODY STRUCTURE

- The machine bed, column, spindle head, cross slides and table are all analyzed and optimized by FEM tests. This design assures high stability and rigidity of the machine, thus making it suitable for heavy-duty machining of all kinds of material.

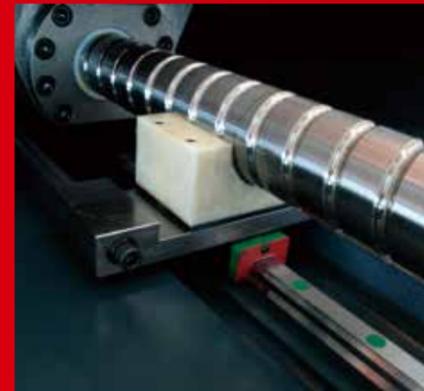

GEAR BOX OF THE THREE AXES

- Three axes feed mechanism employs gear transmission and precise ballscrew with precision class P4 angular contact ball bearings. Gears, ground in accordance with Din level 5, provides good transmission efficiency and also gives the advantages of great transmission torque at low speed and excellent dynamic response at high speed.

MINIMUM SPINDLE DISTANCE

- The distance between spindle centers to Z-axis slideway surface is 150mm. Spindle center is located at the center of headstock which eases the thermal expansion caused by increased temperature of spindle; therefore raises the resistance of the body structure when cutting providing higher machining accuracy and stability.

BALL SCREW COOLING SYSTEM

- Each axis is driven by a large diameter, high precision ground, pre-loaded and double anchored ballscrew providing high accuracy, fast rapid federates and maximum feed thrust. Models with travel over 3m are equipped with cooling system through ballscrew on X-axis to alleviate thermal expansion, resulting in higher positioning accuracy. Models with travel over 4 m possess supporting way for X-axis to solve the problems of overhanging and vibration.

SAFE AND STABLE TOOL MAGAZINE

- Modularized tool magazine offering protection and conveniences. Standard capacity is 30 tools. Optionally also offer customers 40, 60, 90 and 120 tools to choose from.

PRECISE ROLLER TYPE LINEAR GUIDE WAYS

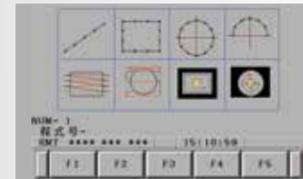

- Feeding systems of X and Y axes adopt the roller type linear guideways which feature the heavy load resistance, rapid dynamic response and low friction coefficient (0.003 ~ 0.005). With independent loop hydraulic balanced system, it could react and save at least 50% energy consumption.

CUSTOMIZED CALCULATOR SOFTWARE FEATURES (OPTION)

MULTI-FUNCTION STATE DISPLAY

- Spindle/Axis Load
- Tools State Display
- Controller Running Timer
- Feed Rate State
- Spindle Speed State
- Coordinate State
- Workpieces Counter
- Date/Time State
- Machining Time State
- Soft-Key Function

G-MENU

- The G-menu function, easy-processing module for customer.

CENTER OF RECTANGLE FUNCTION

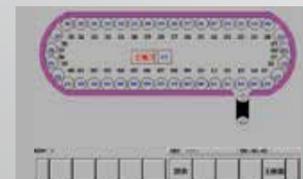

- Measured rectangular workpiece four-point and calculate the rectangular center of the workpiece coordinates and tilt angle.

TOOL LENGTH MEASUREMENT AND SETTING

- Manually setting tool length and compensating numbers. After finishing the measurement, it could change to next tool.

INTELLIGENT ATC SYSTEM MANAGEMENT

- Displaying of the tool number, tool pot number and preparation tool number can be pre-set the tool type in the form.

CALCULATING FUNCTION

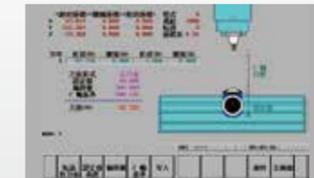

- Calculating function provided customers with fast calculation and completion of the workpiece coordinate corrections and setting.

CENTER OF CIRCLE FUNCTION

- Provide customers with three points to find the center of the circle, user-friendly setting mode.

TOOL LENGTH MEASUREMENT AND SETTING

- Manually setting tool length and compensating numbers. After finishing the measurement, it could change to next tool.

INTELLIGENT ATC SYSTEM MANAGEMENT

- Check and set of user-friendly tool storage, and display the program number, feed rate and spindle speed, allowing users to catch processing states.

HIGH SPEED AND PRECISION SPINDLE DESIGN

- Using new generation 8000rpm direct driven spindle with high speed, high precision, high performance spindle motor, available high-quality rigid tapping. Without noise, backlash and vibration problems, standard accessories with spindle oil coolant system to control thermal displacement then getting the best accuracy.

Using Ø100mm ceramic bearing with the spindle, after long time machining the vibration and thermal displacement could be controlled very well for keeping good tolerance of the dimension and accuracy of the shape.

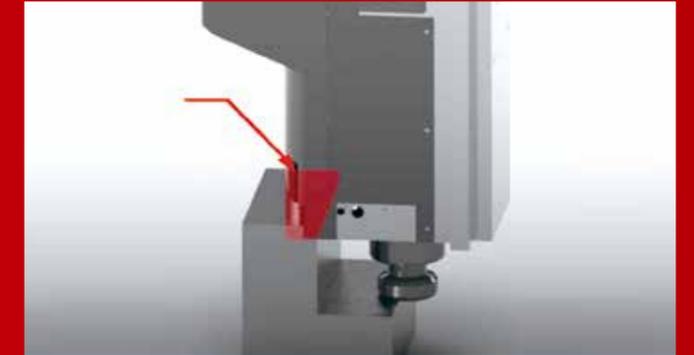

HIGH TORQUE & LOW NOISE GEAR BOX DESIGN

- Gear spindle with 6000rpm: superior power, high speed and accurate precision. Ceramic ball bearing of ID Ø100 is able to achieve high torque of 728N-m while the spindle speed is 341rpm, which is good for heavy duty cutting.

Two-speed gear box consist of DIN level 5 gears, well-performing bearings and oil cooling systems to minimize thermal expansion. Every set of gear box is inspected by the vibration and run-in tests to ensure each gear shifting smoothly and stably, meanwhile achieving G1 level of vibration testing.

- KAFO adopting long nose spindle, suitable for die & mold and specific parts cavities avoids interference during processing. It is able to mount all kind of angular milling head (option)

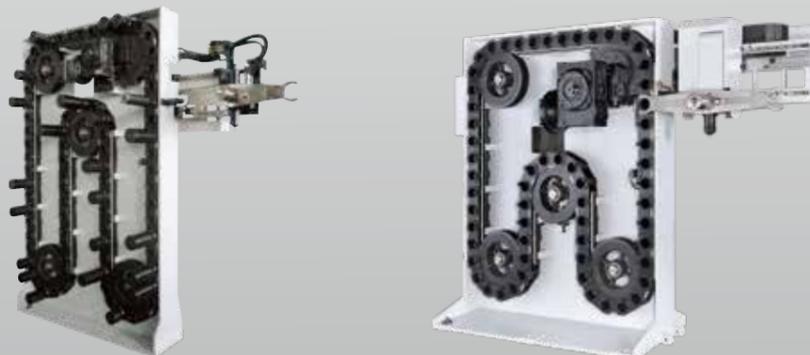

- Other Manufacturer

NEW GENERATION SPINDLE DESIGNED WITH POWERFUL MACHINING ABILITY

/ HIGH RIGIDITY, HIGH TORQUE, HIGH SPEED, LOW VIBRATION LOW NOISE, LOW THERMAL DISPLACEMENT

- Upgrading the output torque of gear head spindle (which is 10% bigger than other manufacturer)
 - Upgrading the main bearing diameter of gear head spindle to 100mm (which is 10mm above than other manufacturer)
 - Strong motor 22/26kW (35HP) is driven by two step gear box, spindle speed 6000rpm and powerful torque to 728N-m, which is most suitable for heavy cutting.
- Also available with roller type bearing spindle 4000rpm could be used in much heavier cutting.

ATTACHED MILLING HEAD DESIGN

/ MANUAL 90° ANGLE MILLING HEAD

/ MANUAL UNIVERSAL HEAD

/ MANUAL EXTENSION HEAD

/ MANUAL ANGLE MILLING HEAD CHANGING UNIT (OPT.)

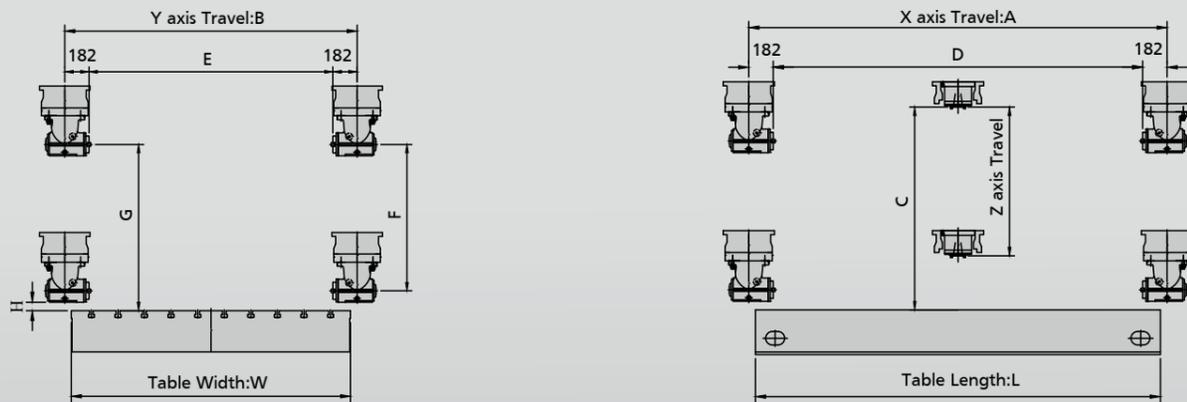

- Manual head change.
- Manual angle milling head can change tool by foot pedal.
- Angle milling head has unclamped hydraulic cylinder, tool can be changed at any position.
- Unique and simple head changing unit doesn't occupy working space.
- Head changing unit has enclosure guards to protect against dirt and chips.
- The structure is firm, compact, safe, reliable, and durable.

PS.: 1. The positioning accuracy inspection is only allowed to execute in KAFO's factory, may not provide inspection at other time after leaving.

2. The temperature of machine installing environment must be around 5~40°C, the surrounding temperature difference should be within 4°C, 0.67°C per hour, under 4°C within 6 hours.

3. As for more details, please refer to operating manual or contact with KAFO sales.

4. The specification is for reference only. KAFO remains the right to modify machine specification, design or property and without prior notice.

PS.: 1. The positioning accuracy inspection is only allowed to execute in KAFO's factory, may not provide inspection at other time after leaving.

2. The temperature of machine installing environment must be around 5~40°C, the surrounding temperature difference should be within 4°C, 0.67°C per hour, under 4°C within 6 hours.

3. As for more details, please refer to operating manual or contact with KAFO sales.

4. The specification is for reference only. KAFO remains the right to modify machine specification, design or property and without prior notice.

RVM/RV SERIES

DOUBLE COLUMN MACHINING CENTER

GREATER 5-FACE MACHINING PERFORMANCE COULD BE SATISFIED CUSTOMER'S MULTI-PROCESSING REQUIREMENTS

- This series with special designed, with the strongest structure, greater rigidity body, using the vertical and horizontal head and tools, automatic exchange, take high rigidity gear box vertical and horizontal spindle, heavy cutting, processing high efficiency, precision machining parts with good quality and accuracy.

After setting the workpiece, 5-face could be automatic completion of the processing. This product is especially suitable for the manufacture of large 5-face precision components, is the perfect partner of your processing.

OPTIONAL MILLING HEAD BY REQUEST

- 90° Head / Universal Head / Extension Head / Extended 90° Head type Extension Head

RVM/RV SERIES DOUBLE COLUMN MACHINING CENTER

/ RV-4135

/ RV-3135

/ RV-4140

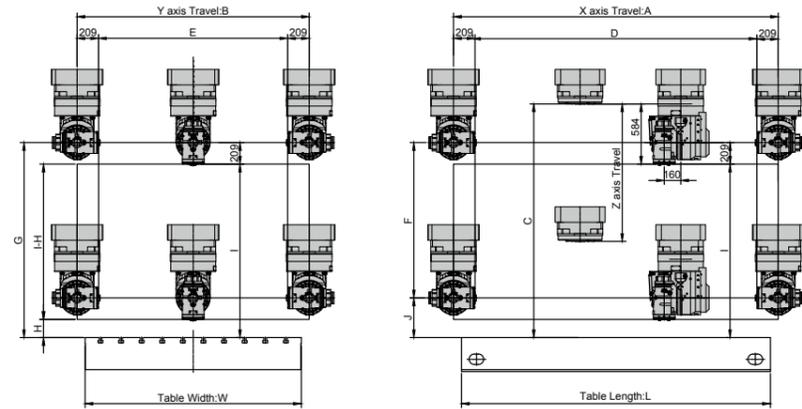

RVM/RV SERIES : SIMPLE AND CONVENIENT HEAD CHANGING UNIT

- Optional automatic head change.
- Optional auto tool changer (max.Ø215mm, length 400mm).
- Angle milling head has unclamped hydraulic cylinder, tool can be changed at any position.
- Unique and simple head changing unit doesn't occupy working space.
- Head changing unit has enclosure guards to protect against dirt and chips.

RVM/RV SERIES DOUBLE COLUMN MACHINING CENTER

/ AUTOMATIC A/C AXES UNIVERSAL HEAD

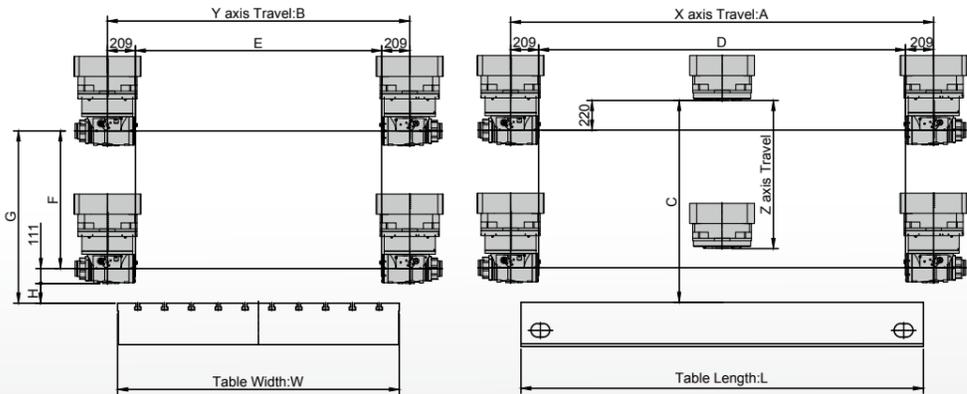

ITEM / SPEC	AUTOMATIC A/C AXES UNIVERSAL HEAD
Indexing	Curvic Coupling (5°, 2.5°, 1°)

RVM/RV SERIES DOUBLE COLUMN MACHINING CENTER

RVM/RV SERIES DOUBLE COLUMN MACHINING CENTER

KRV SERIES

DOUBLE COLUMN MACHINING CENTER

FEATURES

- Three axes travel (X:4200, Y:3700, Z:1100mm) is bigger than other manufacturer.
- Three axes rapid speed with cooling system through ballscrew (X:20,Y20,Z:20m/min) : **FASTEST**
- W axis travel standard : 1000mm, option : 1700mm
- Horizontal Spindle Speed 4000rpm : **BEST**
- Attached head changer and head storage swivel shelf module could be chosen for saving space.
- Ballscrew supporting system
- X axis ballscrew nut cooling
- Adapting linear guideway in X,Y,Z and W

A: Automatic attached head change

B: Automatic vertical and horizontal ATC system

C: Arm type operating control box with weight balance system could be upraise or go down for the operator convenient operation (option).

D: X, Y and Z axes ballscrew with cooling system through ballscrew to alleviate thermal expansion, resulting in higher positioning accuracy.

Models with travel over 4m possess supporting way for X-axis to solve the problems of overhanging and vibration.

/ FULL ENCLOSURE AUTOMATIC SLIDE DOOR (EXCLUSIVE)

/ ARM TYPE HEAD STORAGE

/ RACK & PINION STRUCTURE OF MILLING HEAD STORAGE

/ HEAD UNIT (Z-AXIS DOUBLE BALLSCREW TRANSMISSION)

/ TOOL CHANGE ARM AT ANY POAITION

/ BALLSCREW SUPPORT SYSTEM

RVM5A/RV5A SERIES

DOUBLE COLUMN MACHINING CENTER

RVM5A/RV5A FIXED DOUBLE-COLUMN SERIES

- The whole series with A/C axis specially for the workpiece designed with complex structure can reach high efficiency with 5-AXIS simultaneous machining.
- Symmetry design in whole machine to let cutting loading & thermal equilibrium balanced.
- RVM5A/RV5A adapts three axes with ballscrew cooling system can reduce the ballscrew thermal displacement, and raise the positioning accuracy and repeatability accuracy in each axis. Adapting Heidenhain linear scales and close loop control can enhance the accuracy efficiently.
- Z axis with dual-ballscrew design. The spindle and ballscrews mounted parallelly with the shortest throat depth can raise cutting rigidity. X axis adapts single ballscrew with twin servo motors controlled by electric technology of Master-Slave technology to offer stable torque output and enhance the dynamic rigidity and positioning accuracy of the machine. This helps finishing/high acceleration and deceleration machining perform perfectly.
- This Series adapts Siemens 840DSL or Heidenhain 640 which can exert good efficiency of 5-axis simultaneity.

SPECIFICATION OF THIS MACHINE

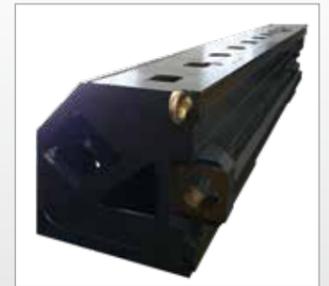

- Travel of X/Y/Z (X:3100, Y:3500, Z:1100mm)(OP:1300mm)
Specially for machining the structure of Aerospace industry.
- Rapid of X/Y/Z (20 m/min, acceleration:0.15G)
High dynamic performance

- Adapting Siemens or Heidenhain controller to exert 5-axis technology and overcome the application on complex surface machining

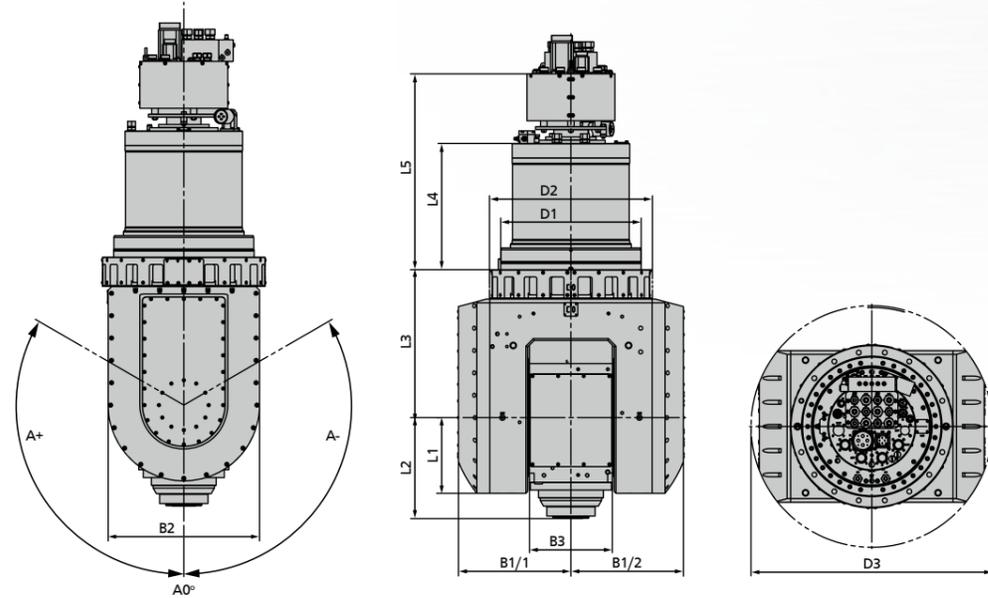

- High Precision (Positioning Accuracy $\pm 5\mu\text{m}$) Kessler 2-axis Head

- Casting with topology design has the feature of light material but high rigidity

APPLICATION RESOURCE SERVICE

CAD / CAM

- Our Products are compatible with a wide variety of CAD / CAM software

FIXTURE PLANNING

- We assist customer to plan fixture to suit your workpiece

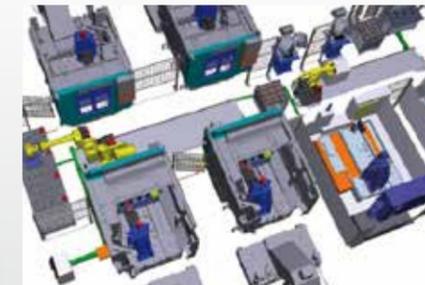

TESTING WORKPIECE

- Benz Mold sample

TOOLING

- We offer the best tools which suit your machining demands

AUTOMATIC PRODUCTION LINE

- We propose customer for automation system

TESTING WORKPIECE

- Cover Mold sample

KAO FONG

TURN-KEY PROJECT PLANNING-EXCELLENT PROCESS

- ▶ Meet customer's processing demand
- ▶ Achieve customer's required quantity production
- ▶ Carry out automation processing
- ▶ Flexibly used in various products

PROFESSIONAL ENGINEERING TEAM

- ▶ Having the most state-of-the-art software and hardware provides customers with the proposal to increase the production efficiency.
- ▶ Improving the processing efficiency through the work analysis, construction method and application test.

PERFECT MACHINE PLANNING AND INSEPARABLE TECHNICAL NETWORK GIVES BEST BENEFICIAL RESULT

Worldwide After-sales Service

- By immediate service network to reach efficient service capability
- Through worldwide service to give supports to all customers
- With experienced and qualified technicians for routine maintenance

Service Network

- Headquarter : Taichung City, Taiwan TEL : +886-4-25662116
- Office : Taipei City, Taiwan TEL : +886-2-22989800
- Office : Tainan City, Taiwan TEL : +886-6-2238661
- Agent : Taipei, Taoyuan, Tainan, Kaohsiung
- Mainland China
- Worldwide
